

seacycle®

- Stable, swift, silent and safe
- High quality construction
- Withstands salt water and every day rental use
- Easy to launch and simple to use
- Full body workout
- Low maintenance
- Environmentally safe

WATER BIKE®

Dear Prospective Purchaser,

"The Jet Ski antidote." "The alternative to a boring NordicTrack." "The silent fishing machine." These are all direct quotes from our customers. SEACYCLE and WATER BIKE are changing the way people around the world enjoy the water or get a full body workout. Whether you live near a lake, on the beach or are looking for a toy for your 150 foot yacht, SEACYCLE and WATER BIKE will surprise you with their speed, ease of transport and incredible durability.

Since 1991 SEACYCLE and WATER BIKE have been used in grueling rental and resort operations around the world. Ritz Carlton, Hyatt Regency, Sandals, Marriott, KOA and hundreds of other hotels on salt and fresh water have proven the fun and durability of our unique craft.

The patented propeller drive system is amazingly efficient. It allows riders of almost any age and physical condition to achieve speeds of up to 13 mph or to effortlessly cruise 50 miles or more in a day. No training or special skills required. Kids and grandparents alike love the silent stable speed of either unit. Exercise enthusiasts enjoy a full body workout burning only calories for fuel and seeing new sights every day.

People use their unsinkable WATER BIKE and SEACYCLE for fishing, exercise, camping, eco tours or effortless cruising. The stable, safe catamaran design is perfect for shallow streams or crossing the English Channel. They disassemble in less than five minutes without tools for easy transport in or on a small car. Every unit is backed up by our unconditional 30 DAY MONEY BACK GUARANTEE and ONE YEAR WARRANTY. The durable polyethylene construction with aircraft grade stainless steel and anodized aluminum components give years of trouble free operation and fun. We guarantee it or your money back.

Get a full body workout with the arm AND leg powered propeller drive.

"The fact that the SEACYCLE combines being on the water, cycling, and a workout is a dream come true."

J.Krock, Conifer, CA

"The WATER BIKE is fun, great exercise and makes a greater tender."

DBS, Charlevoix, MI

Q&A

Fun, exercise, cruising, or fishing all in the same day.

Q: How fast will they really go?

A: Riders in average condition can easily top 10mph the first time. Riders report effortless cruising at 5 to 7 mph on both models. The record is about 13.5 mph.

Q: What about maintenance?

A: The sealed drive housing's oil bath provides continuous lubrication for all the moving parts. Years of rental operation testing has proven that a check of the fasteners and drive tension every ten hours of operation is all that is required.

Q: How do they turn?

A: The SEACYCLE has a hand controlled rudder. WATER BIKE's hands free steering is accomplished by leaning which controls the articulated aft pontoons.

Q: How do they handle in rough water?

A: Rental operations in Maui launch them into 3 foot surf every day. We recommend open ocean cruising in waves of 4 feet or less. Their low wind resistant design also easily handles wind up to 25mph

Q: What kind of money will these units make in rental?

A: It obviously depends on the location, but rental operators report revenues up to \$5000 per unit per month in Hawaii and well over \$2500 per month in other locations.

Q: How many calories will I burn?

A: Depending on your body weight and speed, analysis shows that a 150lb. person will burn about 720 calories per hour at the 65% target heart rate.

Q: Do they really hold up in saltwater?

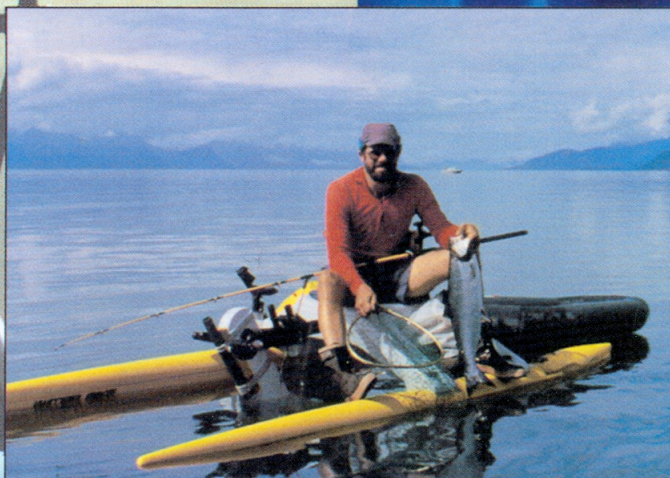

A: Dozens of yachts over 100 feet have them for their guests use. Thousands of units in rental use in saltwater operations ranging from Fiji to Monte Carlo have had no problems. We guarantee durability even in the Great Salt Lake in Utah.

Q: How far can I go on a SEACYCLE or WATER BIKE?

A: They have crossed the English Channel, and the Gulf Stream. The gentleman pictured below took his WATER BIKE from Seattle to Juneau, Alaska. The 1100 mile trek was in cold, rough water retracing a route taken by a SEACYCLE that same summer. Note the size of the fish he caught from his WATER BIKE!!

Q: Where can I buy a SEACYCLE or WATER BIKE?

A: Call us for your local dealer, or if there is not a dealer in your area we can sell directly to you. We ship world wide.

WATER BIKE Outdoor Sportsman Model.

seacycle[®]

Assembles in less than 5 minutes without tools

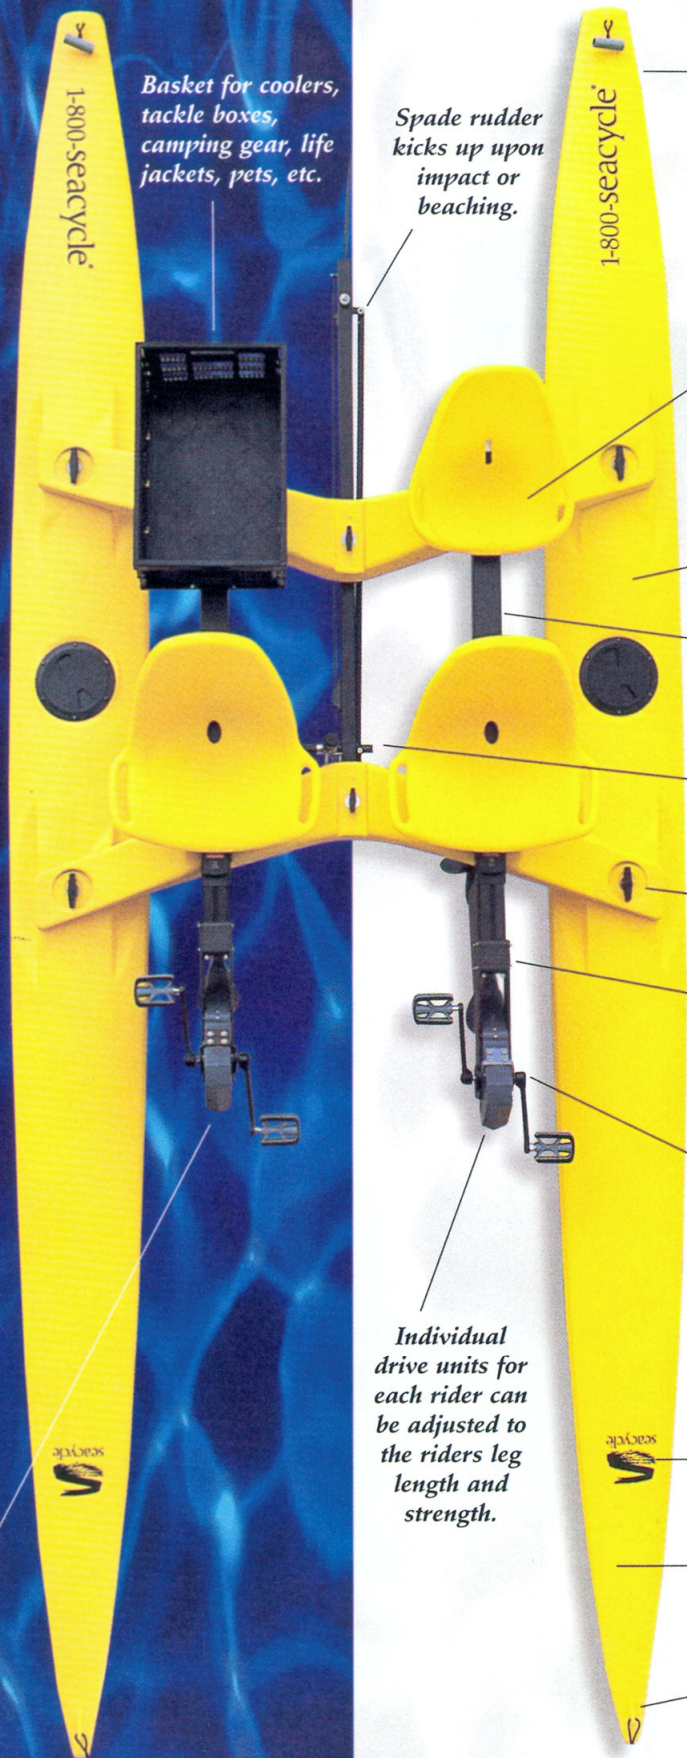

Child or adult seats for up to two riders and two passengers SEACYCLE Twin for family fun on the ocean, lakes or streams.

SEACYCLE Twin converts into a Solo without tools

AquatiCart™

Two wheel model for transporting on hard surface or four wheel model for sand or mud. Custom made for perfect fit.

High density cross linked polymer housing withstands repeated impacts and is corrosion free.

Slip resistant padded pedals.

Drive removes using no tools for transport or storage.

Patented drive buttons lock drive up and down, yet allow it to kick up for beaching or when hitting an underwater object.

Oil filled sump lubricates all moving and friction parts on every revolution preventing corrosion and wear.

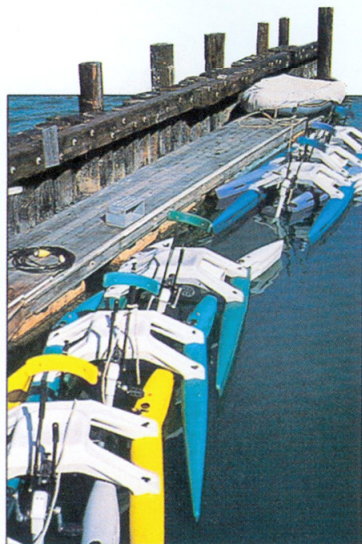

Sealed housing is impervious to saltwater intrusion.

Deflection plate keeps feet dry in almost any sea condition or speed.

Impact resistant composite propellers are computer designed for optimal performance and efficiency. Four sizes available.

The heart of the SEACYCLE and WATER BIKE is the compact, highly efficient and patented drive unit. Five years of grueling testing by rental operators using their SEACYCLES and WATER BIKES up to 2,000 hours per year has resulted in our uniquely durable drive system. The drive unit will automatically kick up and lock in the up position if it encounters a submerged object or if it is being landed on a shore. Maintenance requirements are virtually nil.

In use at resorts and rental operations in over 40 countries. Rental fleets report purchase price pay-back in less than 90 days.

Proven durable and fun for all ages by rental operators world wide

Custom colors and graphics are molded in permanently

Four sets of stainless steel ball bearings at both the upper and lower thrust areas assure smooth operation and long life.

"My wife and I use it constantly to exercise rather than ride our regular bikes. We have improved our cardiovascular system. We both had a physical and our physicians were impressed by how much we have improved. We are in our mid 50's. Of all the exercise equipment we have this one is the best!"

J. Dunn,
Columbus, OH

Used as tenders on hundreds of yachts around the world.
