Easy to Follow Instructional Sheets Included on Disc with every SUT Trailer.

SUT-200-S

This is the oldest, lightest, most unique boat trailer/dolly in our extensive line. Its unique rubberized suspension, eliminates road bumps and shock to your small boat, canoe or kayak. For boats up to 17" in length and 200 lbs maximum weight.

SUT-GPD

This lightweight aluminum dolly is our smallest and simplest. It allows 1 person to transport and launch a small boat, canoe, kayak up to 300 lbs. With 2 tie down points, 2 padded bunks and wide air-filled tires this small dolly glides over uneven surfaces to the water.

SUT-350-S

This trailer will transport a canoe, kayak or narrow sail/power boat up to 22' long. Its light spring suspension gives it a capacity of 350 pounds but also transports your boat smoothly. With the added capacity you will be able to transport gear in the boat, for added ease of getting to your "spot". Made of maintenance free aluminum and is always fully adjustable.

SUT-250-S & SUT-500-S

These trailers are designed for "V" bottom jon boats, semi "V" boats and flat bottom boats up to 500 lbs. The bunks, rolls, axle and bow stand are completely adjustable. The aluminum construction is 50% lighter than steel so it can be used as a dolly.

SUT-250-M2 & SUT-350-M2

For the person who has more than 1 canoe, kayak or small boat. Choose our 250 lb. or 350 lb. capacity model that holds 2 canoes or up to 4 kayaks. Also has standard adjustable crossbars with vinyl extrusions for frictionless ride. Trailer has 6 tie down loops standard as always the axle can be adjusted.

SUT-250-L & SUT-250-LII

These trailers are specifically designed to carry the Laser I and II or Bye sail boat. Boats are supported at 3 points under the bow and gunwale eliminating hull stress points. One person can load or off load using the optional swivel bow support.

SUT-450-C

Transports small Catamaran boats up to 450 pounds. Our patented "T" bolt construction allows full adjustability of the 4 rollers and 2 padded alignment guides. Adjustable axle placement for ideal tongue weight. Trailer ships standard with 2 padded areas and tie down loops for your two piece mast stand.
For catamarans: 14'4" x 7'0" beam or smaller.

SUT-450-I

This trailer is designed for inflatable boats up to 450 pounds. The long bunks, rear transom guide, front padded bow stop and axle position are completely adjustable using our patented "T" bolt construction. Designed for soft bottom inflatables. *(64" maximum Centerline O' Tubes)*

SUT-500-2B

This aluminum trailer is designed to carry 2 boats that together do not exceed 500 lbs., 14' 6" in length or have a beam larger than 62". Ideal for hauling Laser and Sunfish sailboats (or similar boats).

SUT-450-M6

This trailer is designed to carry up to 6 kayaks or 6 SUP boards. The trailer has a carrying capacity of 450 pounds. Overall length is 18' 3", overall width is 68". Trailer comes standard with 24 adjustable web strap clips for securing your boat down on the vinyl covered crossbars. This unit is ideal for a family with four or more kayaks or boards. So light any small car will do the job!

SUT-HDKD

This heavy-duty lightweight aluminum dolly is designed to maneuver trailers in tight spaces. The wide air filled tires roll easily over uneven surfaces. It quickly disassembles for storage and shipping. Includes 2" ball and has a maximum tongue weight of 300 lbs.

SUT-300-U

The ultimate lightweight aluminum hand dolly! With its wide air-filled tires this dolly easily transports many small boats, canoes, kayaks up to 300 pounds. Our "T" bolt construction makes this dolly completely adjustable - which also allows for easy storage. *(Dolly extends from 8'6" - 14' with no tools)*
